

Realizing Community Dreams

Every community has dreams. Some are practical, some help the environment while others allow artistic expression and still others provide delights to the viewer or listener.

Last year, the Foundation gave grants to various communities and their project dreams. Stories and pictures reflect how those projects have enriched each community.

Children, their parents and caregivers, took part in “Be An Art Family” at the Gallery in Salmon Arm, a local pottery club used its grant towards the purchase of a new potters’ wheel. The Arts Council can now offer colour photocopying to its members.

Safety and the environment took centre stage for a couple of communities. A new well was dug for the community hall in Malakwa. The North Shuswap Community Association used its grant toward the construction of vault toilets.
